

THE FIRST STEP TO A GREAT CAR!

NOISY CARS GET QUIET•CHEAP CARS FEEL LUXURIOUS•OLD CARS RIDE LIKE NEW•HOT CARS AND TRUCKS BECOME COOL

YOUR CAR *Becomes* A GREAT CAR!

"Dynamat first and your car or truck will drive and feel like a newer, more expensive luxury vehicle. Dynamat lowers road noise, makes your audio system sound better and louder and helps keep your vehicle cooler."

"Dynamat is the first choice of automotive experts and enthusiasts. Dynamat exceeds OEM specifications and outperforms all other products. Every vehicle can be upgraded with Dynamat, from an old truck to an expensive European luxury sedan. Solid, quiet comfort can be installed!"

TM
-CHIP FOOTE

Always Dynamat First!

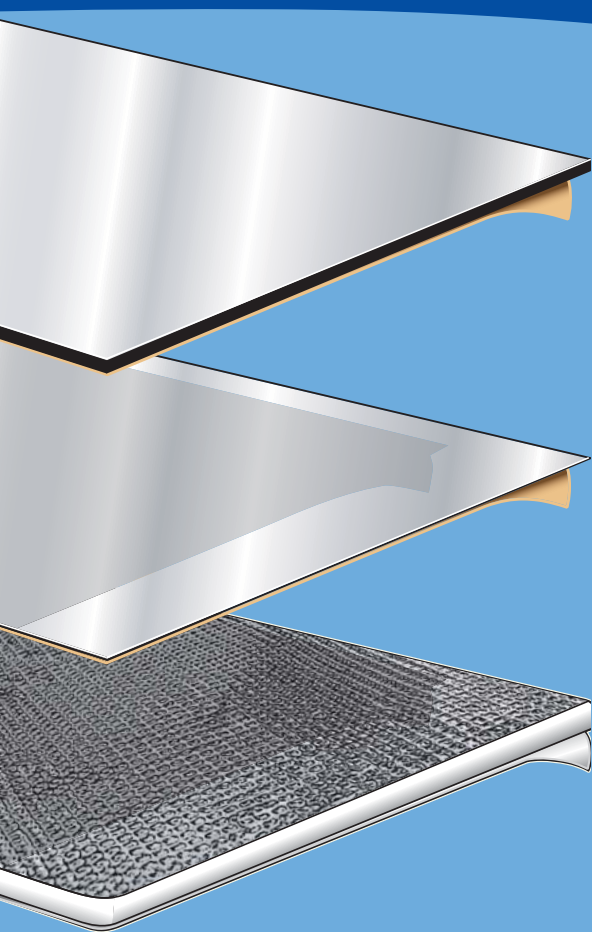

With our critical analysis and "Real World Testing Lab", we are uniquely suited to be the acoustic solutions leader. Our ongoing research and development insure that Dynamic Control will always produce the most effective and efficient materials to solve your sound quality, noise and thermal energy problems.

Dynamat has established itself as the highest quality product for solutions to unwanted noise and vibration. Dynamat was the first consumer oriented sound deadening material available and still retains the greatest distribution. As the number one brand and most recognizable name in acoustic materials, Dynamat is sold in over 60 countries around the globe. Dynamat first – for better sound every where.

Chip Foote™, star of the hit TV show Overhaulin', is a design consultant for Ford Motor Company and famous car builder winning the AMBR Award an amazing 6 times and the Ridler Award 3 times. Long time Dynamat advocate, Chip is the youngest member to be inducted into the Hot Rod Hall of Fame at the age of 31.

WITH DYNAMAT AND DYNALINER

Xtreme Dynamat

Dynamat Xtreme with VECTOR™ Chemistry is a patented elastomeric sound deadener. Xtreme has a .060" thick layer of butyl and .004" thick aluminum face. Xtreme has the highest efficiency sound deadening properties available. Sheet sizes: 10" x 10", 12" x 36", 18" x 32" & 24" x 48" Self-adhesive.

Dynaplate

Dynaplate is a super lightweight solid aluminum sound deadener. Dynaplate is .014" thick and weighs less than 0.2 lbs per square foot. Sheet size: 24" x 30" (5 sq. ft.) Self-adhesive.

DynaShield

DynaShield is a multi-layer heat shield comprised of .010" thick flexible aluminum armor, 1/4" thick mechanically bonded Fire Fibre™ core and aerospace adhesive. DynaShield provides optimal heat resistance for high temperature areas such as turbos and exhaust systems. Sheet sizes: 10" x 12" & 15.5" x 19". Self-adhesive.

V.E.C.T.O.R.™ CHEMISTRY
(Vibro-acoustic Energy Conversion
Technology for Optimum Results)

Dynaliner

A high efficiency, general purpose thermo-acoustic foam available in 1/8", 1/4" and 1/2" thick sheets. Dynaliner provides high acoustic absorption and excellent thermal insulation for roof, firewall, floor, quarter panels, doors and more. Sheet sizes: 32" x 54" (12 sq.ft.) Self-adhesive.

DynaPad

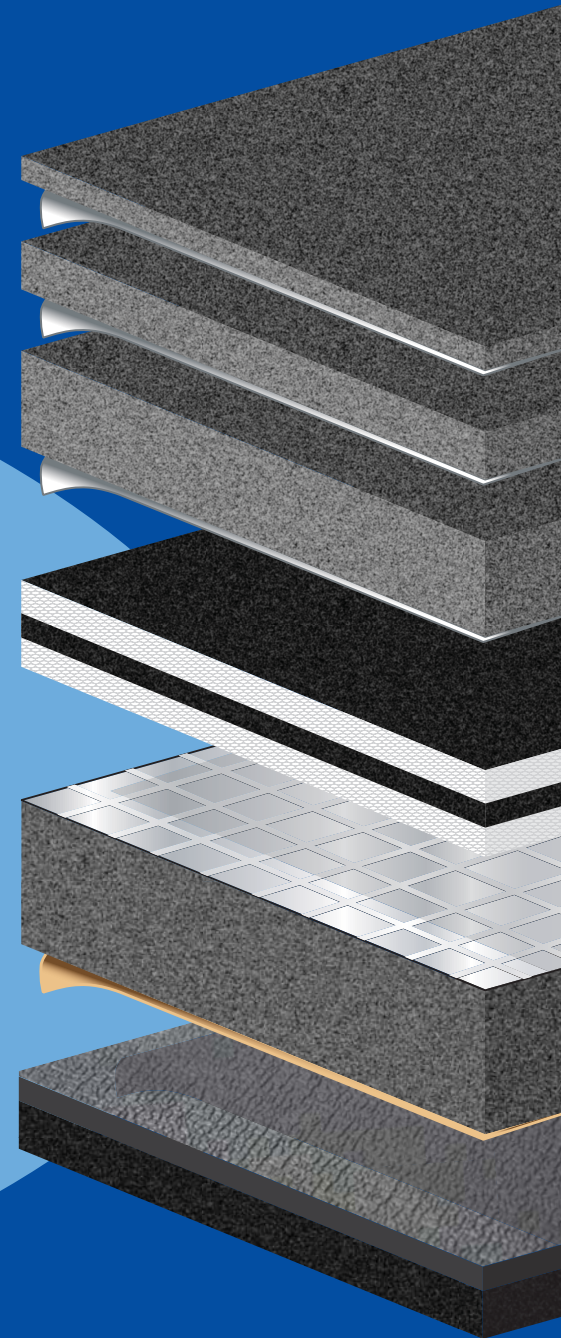

A four layer composite barrier material utilizing a 1lb/sq.ft. vinyl barrier between two layers of 3/16" thick acoustic foam with a urethane top facing. For low frequency and thermal control. Sheets size: 32" x 54" (12 sq.ft.) Non-adhesive.

The Hoodliner

A 3/4" acoustic sound soaker foam with an aluminized reinforced skin that is cleanable and oil and water resistant. The Hoodliner has a high-tack pressure sensitive adhesive for easy peel and stick application. Sheet size: 32" x 54" (12 sq.ft.) Self-adhesive.

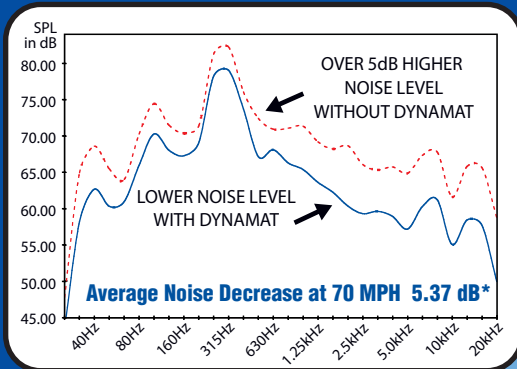

DynaDeck

A 3/8" waterproof, carpet replacement utilizing a 1lb/sq.ft. vinyl barrier over a 1/4" high efficiency thermo-acoustic foam. Has a durable deep twist embossed vinyl grain top facing. Sizes: 3ft, 6ft, 9ft, 12ft & 25ft x 54" wide. Non-adhesive.

Cut ROAD NOISE

Scientific Proof

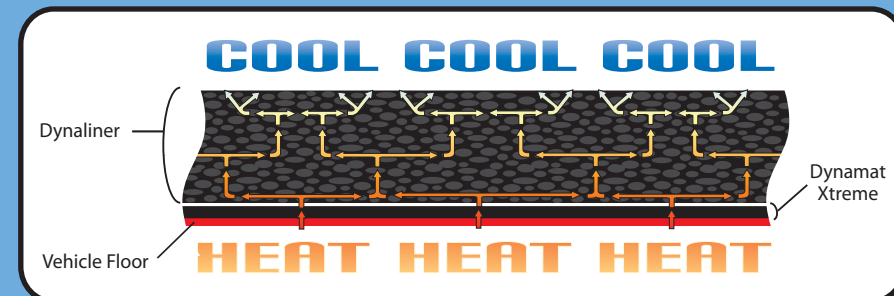

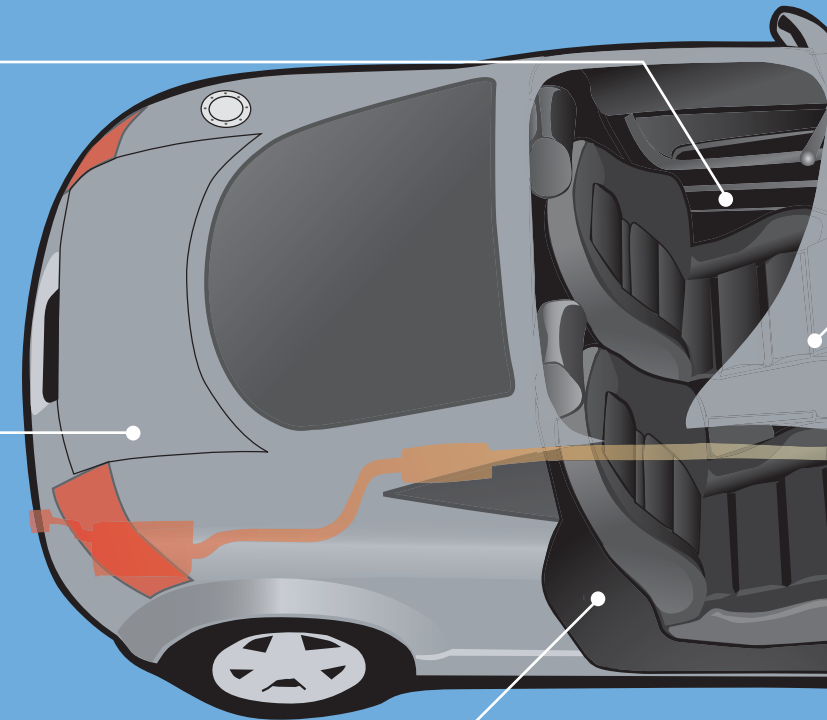

Noise Level Reduction Test

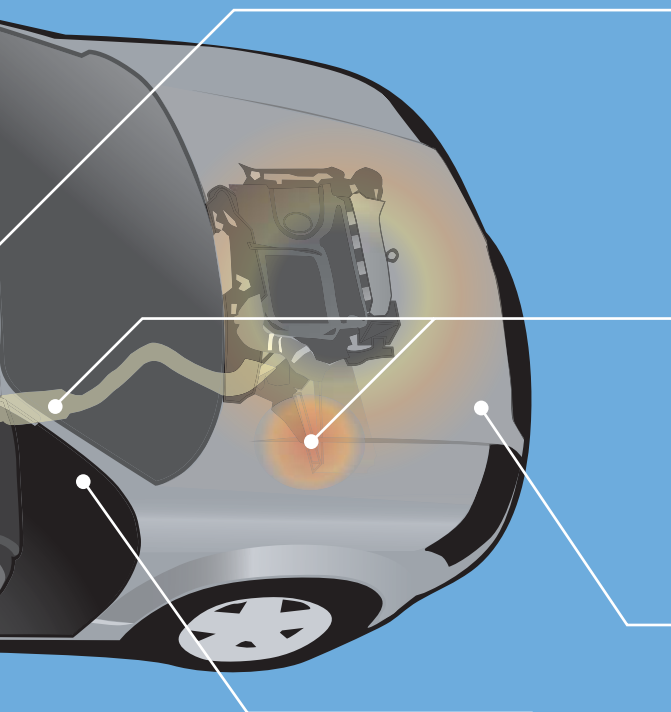

*Chart represents a specific vehicle test. Individual results may vary.

Dynamat® 1ST

For maximum effect, Dynamat Xtreme should be installed first on all interior sheet metal of your vehicle. Dynamat Xtreme has the highest damping efficiency available and is more effective at stopping noise and vibration than other products. Dynamat Xtreme is very moldable and conforms easily to all interior surfaces. The patented butyl layer is formulated with VECTOR™ Chemistry for amazing energy conversion making your car more quiet, more solid and giving you more comfort. Use Dynamat on your doors, floor, roof, hood and trunk for a really quiet, cool and incredibly solid ride.

Beat THE HEAT

Dynaliner® 2ND

Dynaliner is the perfect light-weight super insulator to use on top of Dynamat. This durable, crush and tear resistant material has the highest heat blocking properties available in a single layer. Dynaliner isn't affected by oil and does not absorb water. Dynaliner provides acoustic absorption and excellent thermal insulation for roof, firewall, floor, quarter panels, doors and even as a hoodliner. Available in 1/8", 1/4" and 1/2" thick sheets.

DynaShield™

Looking to block intense heat from turbos, mufflers, catalytic converters and exhaust systems? DynaShield is a versatile barrier which can be used to stop heat at the source and help keep your passenger compartment cool. DynaShield is made with a mechanically bonded, triple layer protective shield comprised of flexible aluminum armor and a Fire Fibre™ core. DynaShield is available in a variety of sizes and can be easily cut and molded to custom fit specific applications.

The Hoodliner®

Protect your hood's paint and reduce irritating noise with The Hoodliner. The sound soaker foam absorbs engine noise while the aluminized outer skin creates an easily cleanable water and oil barrier.

DynaPad®

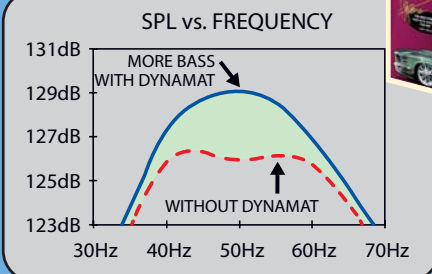

Looking for extra cool & quiet? DynaPad is a four part composite barrier providing maximum acoustical attenuation and excellent thermal insulation. These heavier materials utilize "Dissimilar Layer Insulating" technology that solves two of the most difficult automotive problems; exhaust system heat and low frequency noise. Use primarily on the floor and firewall for cool comfort. DynaPad: 1 lb/sq.ft. vinyl barrier between layers of acoustic foam.

Get BETTER SOUND EVERYWHERE

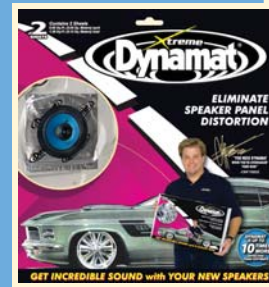

WANT MORE BASS?

Low SPL results when your subwoofer causes vibration and movement of your vehicle's body panels. When the vehicle's panels are stabilized by a Dynamat Trunk Kit, you get the tightest, loudest bass that your subwoofer can produce.

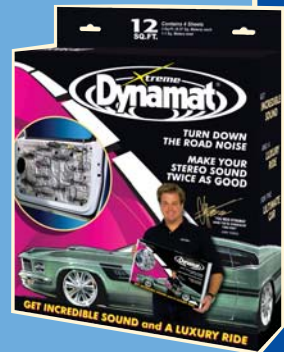

WANT BETTER SOUND?

Even the best speakers create vibrational distortion so the best professional installers use Dynamat. A Dynamat Speaker Kit stops the vibration and makes any speaker sound its very best.

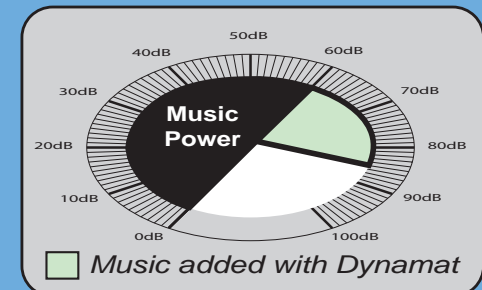

WANT LESS ROAD NOISE?

A Dynamat Door Kit drops road noise level as much as 30%. Less noise means more music. Dynamat reinforces door speakers creating an "Acoustic Enclosure". Your speakers handle more power and play louder!

DYNAMAT
WALL·TO·WALL
AND
Get it all!

WITHOUT DYNAMAT

I don't like to be irritated by loud, rattling, flimsy cars. The faster I go, the more road noise I hear! High road noise keeps me from hearing half my music, phone calls, mobile video and navigation in my car!

WITH DYNAMAT

Dynamat lets me relax and enjoy my time in my car. My stereo sounds loud and clear. I can hear ALL my music, navigation and phone calls. Now everyone says they can hear me on my Bluetooth®. Dynamat gives me the ultimate car!

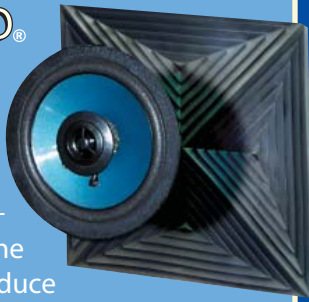

LOOK

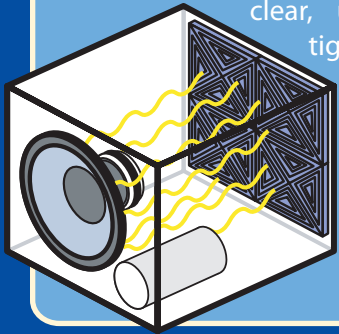

There's more

DynaXorb®

DynaXorb eliminates speaker back-wave distortion using sonic stealth technology. Removing the back-wave distortion from the speaker allows it to produce the full quality potential it was designed for, and deliver all the sound you paid for!

Covering the back wall of a subwoofer enclosure with DynaXorbs will eliminate the back-wave distortion. The result is clear, uncolored, accurate, tight bass. DynaXorbs are especially important inside ported enclosures because the back-wave distortion can easily escape through a port.

DynaSpray®

Want an easy solution for sound deadening and thermal insulation for hard to reach areas? DynaSpray is a water based, suspended microsphere coating that can be used as an interior treatment, an undercoating or under the hood.

DynaSpray can be left as flat black or finish painted. This highly durable, multi-purpose liquid contains rust inhibitors for long lasting protection.

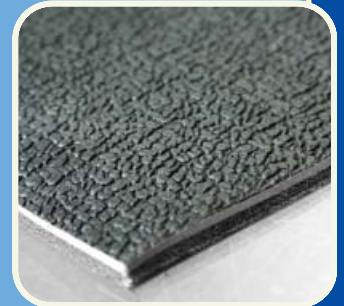

Available in quarts for small projects and 2.5 gallon jugs for large projects, DynaSpray can be applied using our Spray Gun #10025* or brushed or poured onto surfaces.

*Air compressor is required for spray gun use.

DynaDeck™

DynaDeck is a waterproof, three part composite carpet replacement combining the high thermal insulation capability of Dynaliner with the low-frequency exhaust noise rejection of DynaPad. The top layer is a durable deep twist embossed vinyl grain that matches the textured floor pattern of vintage cars.

DynaDeck does not absorb water and is ideal for use in street rods, jeeps, convertibles and vintage sports cars where a durable, waterproof floor material is desired.

For optimal results, install DynaDeck over Dynamat. DynaDeck is available in 54 inch wide rolls 3, 6, 9, 12 and 25 feet long.
